-

Deployment Guide

Option 1: Vercel (Recommended for Next.js/React)

1. Install Vercel CLI: `npm i -g vercel`
2. Navigate to project folder: `cd badal-meher-portfolio`
3. Deploy: `vercel --prod`
4. Or push to GitHub and connect to Vercel dashboard

Option 2: Netlify (Recommended for static sites)

1. Install Netlify CLI: `npm i -g netlify-cli`
2. Navigate to project folder: `cd badal-meher-portfolio`
3. Deploy: `netlify deploy --prod --dir .`
4. Or drag & drop folder to netlify.com

Option 3: GitHub Pages

1. Create a repository: `badal-meher-portfolio`
2. Push code to main branch
3. Go to Settings > Pages
4. Select “Deploy from a branch” > main / root
5. Your site will be at <https://yourusername.github.io/badal-meher-portfolio>

Option 4: Cloudflare Pages

1. Sign up at cloudflare.com
 2. Go to Pages > Create a project
 3. Connect your GitHub repository
 4. Build settings: Framework preset = “None”, Build command = ““, Build output directory = “/”
 5. Deploy
-

SSL & Security Setup

Free SSL

- **Vercel:** Automatic SSL via Let’s Encrypt
- **Netlify:** Automatic SSL via Let’s Encrypt
- **Cloudflare Pages:** Automatic SSL
- **GitHub Pages:** Automatic SSL (for custom domains, use Cloudflare)

Cloudflare Protection (Recommended)

1. Add your domain to Cloudflare
2. Update nameservers
3. Enable:
 - Always Use HTTPS
 - Auto Minify (JS, CSS, HTML)
 - Brotli compression
 - Rocket Loader (optional)
 - Browser Cache TTL: 4 hours

Security Headers (Add via Cloudflare or server config)

```
X-Frame-Options: DENY
X-Content-Type-Options: nosniff
Referrer-Policy: strict-origin-when-cross-origin
Permissions-Policy: geolocation=(), microphone=(), camera=()
Strict-Transport-Security: max-age=31536000; includeSubDomains
```

SEO Optimization Checklist

- Update canonical URL in <head>
- Replace og:image with your actual image URL
- Update Schema.org sameAs links with real social URLs
- Add Google Analytics 4 tag
- Submit sitemap to Google Search Console
- Verify domain in Google Search Console
- Add robots.txt (included)
- Add sitemap.xml (included)
- Set up Google Business Profile
- Create social media profiles and link back

Customization Guide

Update Personal Information

1. **Name:** Search and replace “Badal Meher” in index.html
2. **Tagline:** Update hero description and about sections
3. **Social Links:** Update all href attributes in social cards
4. **Email:** Update mailto: links
5. **Images:** Replace Unsplash URLs with your own in gallery section
6. **Stats:** Update data-count attributes in hero stats

Update Colors

Edit CSS custom properties in :root:

```
--electric-blue: #00d4ff; /* Your accent color */
```

```
--deep-blue-900: #020617; /* Your dark background */
```

Add/Remove Social Links

Edit the social grid in `index.html` social section. Each card follows this pattern:

```
<a href="YOUR_URL" class="social-card platform-name">
  <div class="social-icon-wrapper">
    <i class="fab fa-icon-name"></i>
  </div>
  <div class="social-info">
    <h3 class="social-name">Platform</h3>
    <span class="social-handle">@username</span>
  </div>
</a>
```

Browser Support

- Chrome 90+
- Firefox 88+
- Safari 14+
- Edge 90+
- Mobile Safari (iOS 14+)
- Chrome Mobile (Android 10+)
